

I CLAIM:

1. An air cleaner for engines comprising a case, a cover, and an air cleaner element accommodated in a space defined by the case and the cover; wherein, an air inlet and an air passage are provided to the case, and a fender is provided below the case on the side of the air inlet and the air passage.
2. An air cleaner for engines as claimed in Claim 1, wherein, a hollow tube extends externally from the peripheral of the air inlet to admit the air to enter into the air cleaner element .
3. An air cleaner for engines as claimed in Claim 1, wherein, a supplementary air inlet is provided below the case.
4. An air cleaner for engines as claimed in Claim 3, wherein, the supplementary air inlet also functions as drainage.
5. An air cleaner for engines as claimed in Claim 1, wherein, the air passage relates to a hollow tube to deliver air into the carburetor.
6. An air cleaner for engines as claimed in Claim 5, wherein, the hollow tube to deliver air is shielded by the fender.
